ABOUT ME

From the moment I produced "Hello World" in the console of my first application, I knew I was hooked into the world of software development. But software development has never been "just a job" for me, it's offered an engaging challenge to continually learn and improve my HTML, CSS, JavaScript and React skills. What started with a simple "Hello World" has become a full-fledged passion that only gets more exciting.
Below you'll find projects I've completed that showcase my skills and general background in developing software.

CERTIFICATES

SheCodes
Frontend Development

SheCodes
Advanced React Development

SheCodes
Advanced Responsive Development

Digital Bhem
Web Development Internship
May 2023 - July 2023

Digital Bhem
Artificial Intelligence Internship
August 2023

Hotel Booking Website

Built a website for hotel booking included booking request area, about us section, available rooms and room rates, a photo gallery, available services, a reviews section, hotel new section and a subscribe section.

Travel Project

Built a website about my favorite place to travel and some of my favorite restaurants located there. Used grids and cards to add organization and structure, and embeds to show the location of the restaurants. Used responsive design techniques to make the user experience consistent across all screens.
